

# THE KING'S BOOK OF NUMEROLOGY™, Volume 13

## BAD GUYS

---

### AUTHOR'S INTRODUCTION

As we all know, we live in a bipolar world which exists in a bipolar universe. Therefore, for every good there is a bad and for every bad there is a good. Thus, there are good guys and there are bad guys. This 13<sup>th</sup> Volume of *The King's Book of Numerology™* series is about some of the bad guys—those individuals who are mean, nasty, vicious, evil. This book will address various numerological aspects of these individuals so we can assess how their numbers work in relation to their bad actions and dark behaviors.

The phrase “Bad Guys” does not apply strictly to males. It includes females as well. “Guys” is a universal phrase for people in general, as has been historically customary.

The behaviors and actions of Bad Guys are varied. Some are habitual liars; some are thieves and robbers; some are killers; others are traitors, thugs, cult leaders, sexual predators, pedophiles, gangsters, grossly misguided athletes and financial robber barons.

Bad Guys come in all ages, races, genders, shapes and sizes. They exist in every country and in every economic class from rich to poor, educated to non-educated, religious to non-religious. In short, Bad Guys are, sadly, an integral aspect of the fabric of this world. They will never not exist and so to understand the relationship between their numbers and their actions can only broaden our perception and comprehension of this segment of our society.

Please be aware that the King's Numerology™ makes no claims as to what numbers and number patterns cause Bad Guys to do what they do. However, with greater study of this aspect of society we can begin to understand them and make adjustments accordingly.
